

INCLUSIFY

Cover Letter — Final Submission

Group 7 (G07) • Technion Design Project — Course Submission

Shahaf Wieder, Barak Sharon, Rasha Daher, Lama Zarka, Adan Daxa

Submission date: August 20, 2026

To the Course Staff and the Achva LGBT Organization,

We are pleased to submit the final delivery of Inclusify, a natural language processing platform developed by Group 7 (G07) in collaboration with the Achva LGBT organization to detect and correct LGBTQphobic content in academic writing. Designed to identify outdated, biased, or stigmatizing terminology in both Hebrew and English, the tool empowers researchers and students to align their work with inclusive language standards. This submission includes the complete system, its full documentation, and the client's signed approval for delivery.

Access to the Live System

The live system is available at: <https://frontend-production-780b.up.railway.app>

No account is required to use the analyzer; reviewers may also register or sign in with Google to save their analysis history and revisit reports.

Note — first-run delay

If the system has been idle, the first analysis may take one to three minutes while the AI model starts. This is expected cold-start behavior, not a malfunction.

Project Files & Repository

All project files are included in **G07 - Inclusify - Project.zip**, containing the complete source code — frontend, backend, database schema, ML training pipeline and model adapters, infrastructure definitions, and repository documentation. No credentials or secrets are included in this package.

For reference, the project is also hosted at: <https://github.com/achvalgbt/Inclusify.git> (public repository — no access request required).

Submission Contents

The table below lists every file included in this submission.

File	Description
G07 - Inclusify - Cover Letter.pdf	This letter — inventory of the submission and access information.
G07 - Inclusify - User Guide.pdf	Instructions for using the live system, for all user types: guest visitors, registered users (students, researchers, lecturers), and site administrators (Achva staff).
G07 - Inclusify - Technical Guide.pdf	Installation of the system (local and cloud) and its ongoing maintenance: configuration, deployment, monitoring, troubleshooting, and backup.
G07 - Inclusify - Development Guide.pdf	Orientation for developers making future updates: architecture, codebase structure, testing, CI/CD, and the ML retraining pipeline.
G07 - Inclusify - Project.zip	Complete project source: frontend, backend, database schema, ML pipeline and model adapters, infrastructure definitions, and repository documentation.
G07 - Inclusify - Advisors Approval Form 2025-6 - Final submission	Achva's & Academic Advisor signed approval for delivering the project.

Client Approval

This submission includes the signed approval from our client, the Achva LGBT organization, confirming delivery of the project. The Advisors Approval Form is signed by Ofek Dan (Project Advisor — Coordinator of Professional Forums, Achva), confirming the complete handover of the project and all associated deliverables, and by our academic advisor Noam Cohen, confirming the project fulfils all academic requirements. Both signatures are dated 16 August 2026.

Closing

We thank the course staff and our client, the Achva LGBT organization, for their guidance and partnership throughout this project. For any questions regarding this submission, please contact Shahaf Wieder (project manager) at shahafwieder@campus.technion.ac.il.

Sincerely,
Group 7 (G07) — Inclusify
